

ABIDZAR AL GHIFARI

Junior Web Developer | Information Systems Student (Working Professional Program)

West Jakarta, Indonesia • abdzz2307@gmail.com • +62 831-9156-0934 • [LinkedIn](#) • [Portfolio](#)

PROFILE SUMMARY

Software Engineering graduate of SMK Telkom Jakarta, currently pursuing a Bachelor's degree in Information Systems (working professional program), with hands-on experience building full-stack web applications using Laravel (PHP), React.js, and Node.js, plus exploratory AI agent projects. Backed by a problem-solving foundation from IT Support experience. Comfortable working with REST APIs, relational databases, and cloud deployment. Seeking a Junior Web Developer / Software Developer role to contribute and grow within an engineering team.

CORE SKILLS

- Core: Laravel (PHP), JavaScript/TypeScript, React.js, Node.js/Express.js, REST API, PostgreSQL/MySQL
- Also Familiar With: Python, Vue.js, Tailwind CSS, Docker, Git/GitHub, Supabase/Firebase, Unity (C#), Arduino
- Tools & Practices: Vercel, Render, Cloudflare, Sentry, UptimeRobot, Prompt Engineering, n8n

WORK EXPERIENCE

IT Support Intern — PT Exeed Indo Jaya

Jul 2025 – Oct 2025

- Diagnosed and resolved software/system issues on 20+ workstations, minimizing operational downtime.
- Handled and resolved Service Requests (SR) systematically while maintaining user satisfaction.
- Performed troubleshooting of VMware environments and system configuration to optimize operational performance.
- Collaborated across teams for escalation, documentation, and resolution of complex infrastructure issues.

FEATURED PROJECTS

Full-Stack Web Application — *Laravel, React.js, TypeScript, Tailwind CSS, MySQL, Supabase*

- Built the backend as a RESTful API using Laravel, designing the database schema and business logic with Eloquent ORM and MySQL.
- Developed the frontend with React.js, TypeScript, and Tailwind CSS, fully integrated with the Laravel API.
- Implemented authentication and real-time data using Supabase; deployed via Docker to Vercel/Render.

Business Application with Payment Gateway — *PHP, Laravel, MySQL*

- Built a business web application using PHP and Laravel, covering core transaction and business logic flows.
- Integrated a payment gateway to handle online transactions, including status checks and callback/webhook handling.
- Designed the database structure with MySQL and implemented CRUD features for business data management.

Autonomous AI Agent Deployment — *Python, n8n, Hermes LLM, REST API*

- Built an autonomous AI agent using Hermes LLM and n8n workflow automation with Python orchestration logic.
- Built prompt pipelines and REST APIs; deployed with UptimeRobot and Sentry monitoring.

Interactive Game & IoT Prototypes — *Unity (C#), Roblox Studio (Lua), Arduino*

- Developed interactive 2D/3D game mechanics using Unity (C#) and Roblox Studio (Lua).
- Programmed Arduino Uno microcontrollers with sensors and actuators for IoT prototypes.

EDUCATION & CERTIFICATIONS

Bachelor's in Information Systems (Working Professional Program) — currently enrolled, started 2026

SMK Telkom Jakarta — Vocational Diploma, Software Engineering (Rekayasa Perangkat Lunak)

Certifications: TOEFL Certificate (2026) • CISCO JavaScript Essentials 1 (2025) • CISCO IT Essentials 1 (2023)

LANGUAGES

Indonesian: Native English: Professional Working Proficiency
